EDC E5 Tool-Light w/Magnetic Base

KLARUS E5 EDC Tool-Light with magnetic base and dual light sources is made from 6063 aluminum alloy, boasting a mere 35.8 gram of weight, and only 15mm thick in a compact and light-weight design.

The main COB led (round) is matched with an auxiliary COB led (rectangle), covering both close up area lighting and a focused beam for distance illumination. With a max output of 470 lumens, and 6 output modes, the E5 has the versatility to handle any situation.

The magnetic base and the pocket clip combination allows the E5 to be mounted virtually anywhere for hands-free operation. Type-C recharging gives the E5 a 12 hours runtime, combined with the IPX4 waterproof rating, and 1 meter drop resistance, makes the E5 an invaluable tool in the outdoors.

Highlight:

- ①35.8 gram, 15mm thick, compact and easy to carry, an essential tool for the outdoors
- ②Main/Aux. dual light sources; 6 output modes; 470 max output; has both long range beam and area lighting
- ③Magnetic base + clip combination for versatile attachment options (Hat, Backpack, metal object, etc.)
- ④12 Hr. worry-free runtime with Type-C fast recharging
- ⑤6063 Aluminum alloy construction; IPX4 waterproof rating; 1 meter shock resistance; ready for the rugged terrains
