

2AAA eLED® MPL I

It's a pocket light, a cap light, and even an inspection light. The UK2AAA eLED Mini Pocket Light I owes this versatility to its unique ultra compact battery arrangement. Additionally, the light boasts a 5 times leap in brightness and performance over traditional mini-lights due to a state-of-the-art LED and electronic circuitry. As a result the bright center weighted beam travels farther into the darkness and can actually replace larger flashlights that carry more batteries. A non-breakable clip is included for attaching the light to the bill of a ball cap or the brim of a hard hat. Built ruggedly to last, it's ok to drop it...even in the water!

FEATURES

- Built-in current regulation circuit for constant light output and long lamp life
- Thermal Recovery System recycles heat from the LED to warm batteries for improved performance in low temperatures
- Twist ON and OFF switch
- Waterproof O-ring seal
- Nylon clip included for attaching to safety glasses or the brim of a cap
- Key ring for use as a pocket light
- ABS and Polycarbonate plastic construction

*Clips easily to
the brim of any helmet*
